

Commercial Name	INCI	Producer	Description
BRB 1018	Dimethiconol, Aqua, TEA-dodecylbenzenesulfonate, Methylchloroisothiazolinone, Methylisothiazolinone	BRB	Silicone emulsion for easy formulation of hair care products. Great additive for 2in1 shampoo-conditioner products for daily use. Concentration easily adjustable by dilution in water; Protective layer during drying; Gives soft and silky feeling; Improves both wet and dry combing.
BRB 1288	Amodimethicone, Cetrimonium Chloride, Trideceth 12	BRB	Silicone emulsion for easy formulation of professional hair care products. Concentration easily adjustable by dilution in water; Protective layer during drying; Gives soft and silky feeling; Improves both wet and dry combing.
BRB 1736	Dimethicone, Dimethiconol	BRB	Silicon rubber dispersed in linear dimethicone. Excellent lubricant and film forming properties. Increases the waterproof effect, particularly suitable in sunscreens and night creams.
BRB 1844	Cyclopentasiloxane, Dimethicone	BRB	Linear Dimethicone with high molecular weight dispersed in cyclomethicone. Excellent lubricating and film-forming properties. Increases the waterproof effect. Ideal for sun and night creams.
BRB 523	PEG/PPG 18-18 Dimethicone	BRB	Wetting agent, emulsifier and as a surfactant for the formation of stable foam. Used in products for skin care and as a plasticizer in styling products in 'hair care. Hair detangling action.
BRB 526	PEG12 Dimethicone	BRB	Wetting agent, emulsifier and as a surfactant for the formation of stable foam. Used in products for skin care and as a plasticizer in styling products in 'hair care. Hair detangling action.
BRB 6373	Cyclopentasiloxane, PEG/PPG-18/18 Dimethicone	BRB	Silicone emulsifier for A/S formulation. It can be used at cold temperatures in order to produce fluid creams (also transparent ones).
BRB CM 50	Cyclopentasiloxane	BRB	Volatile silicone. Gives silky texture. Improve spreadability and absorption on the skin, giving a delicate skin feeling in short time.
BRB CM 56-S	Cyclopentasiloxane, Cyclohexasiloxane	BRB	Volatile silicone. Gives silky texture. Improves spreadability and absorption on the skin, giving a delicate skin feeling in medium-time.

Commercial Name	INCI	Producer	Description
BRB DM 0.65	Disiloxane	BRB	Highly volatile silicone which increases the drying effect of the finished product both on the skin and on the hair. It can be used as an alternative to ethanol in deodorants and sprays.
BRB DM 1	Trisiloxane	BRB	Highly volatile silicone which increases the drying effect of the finished product both on the skin and on the hair. It can be used as an alternative to ethanol in deodorants and sprays.
BRB DM 1.5	Dimethicone	BRB	Linear polydimethylsiloxane fluid with a low viscosity and low molecular weight.
BRB DM 10	Dimethicone	BRB	Fluid linear polydimethylsiloxane of low viscosity and low molecular weight.
BRB DM 100	Dimethicone	BRB	Fluid linear polydimethylsiloxane of medium viscosity and medium molecular weight.
BRB DM 1000	Dimethicone	BRB	Fluid linear polydimethylsiloxane of medium viscosity and medium molecular weight.
BRB DM 12500	Dimethicone	BRB	Fluid linear polydimethylsiloxane of medium viscosity and medium molecular weight.
BRB DM 350	Dimethicone	BRB	Fluid linear polydimethylsiloxane of medium viscosity and medium molecular weight.
BRB PTM 20	Phenyl Trimethicone	BRB	Gives silky texture and shine. Compatible with oils, esters and waxes. Ideal for the dispersion of pigments in make-up.
BRB SG 116	Cyclopentasiloxane, Dimethicone/Vinyl Dimethicone Crosspolymer	BRB	Lipogelling agent used in water-in-oil and water-in-silicone formulations and in other silicone fluids. It is easy to formulate and compatible with a variety of lipophilic active ingredients, fragrances and sunscreens. Provides dry smoothness and a silky feel. It reduces the stickiness in the formulations, improving both wet and dry combing. Used in skin care and hair care.
BRB SG 517	Dimethicone & Dimethicone/Vinyl Dimethicone Crosspolymer	BRB	Lipogelling agent used in water-in-oil and water-in-silicone formulations and in other silicone fluids. It is easy to formulate and compatible with a variety of lipophilic active ingredients, fragrances and sunscreens. Provides dry smoothness and a silky feel. It reduces the stickiness in the formulations, improving both wet and dry combing. Used in skin care and hair care.

Commercial Name	INCI	Producer	Description
BRB TMS	Trimethylsiloxysilicate	BRB	High level silicone resin powder for no-transfer and long lasting effect. Waterproof effect.
BRB TMS-30D	Dimethicone, Trimethylsiloxysilicate	BRB	Lipogelling agent used in water-in-oil and water-in-silicone formulations and in other silicone fluids. It is easy to formulate and compatible with a variety of lipophilic active ingredients, fragrances and sunscreens. Provides dry smoothness and a silky feel. It reduces the stickiness in the formulations, improving both wet and dry combing. Used in skin care and hair care.
BRB TMS-50C	Cyclopentasiloxane, Trimethylsiloxysilicate	BRB	High level silicone resin powder for no-transfer and long lasting effect. Waterproof effect.
